

NOURA MOHAMED IBRAHIM ALI

Full Stack Developer

01064943625 | noramohamedibrahim19@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Full Stack Developer with a Bachelor's degree in Information Systems from Zagazig University (2026) and practical experience building scalable, production-ready web applications using React.js, PHP, and Laravel. Successfully developed 5+ end-to-end projects, including e-commerce platforms, administrative dashboards, and RESTful backend services with secure authentication and role-based access control. Proficient in MVC architecture, API development, database design, and responsive frontend development. Awarded **1st Place** in a competitive frontend development workshop, reflecting a strong commitment to continuous learning, clean code practices, and delivering impactful software solutions.

EDUCATION

Bachelor of Science — Information Systems

Graduated July 2026

Faculty of Computers and Information, Zagazig University, Egypt

TRAINING & EXPERIENCE

Backend Development Trainee

Apr 2026 – Jun 2026

National Telecommunication Institute (NTI) — 90-Hour Program

- Completed an intensive 90-hour backend development program focused on PHP, Laravel, and database design.
- Built a graduation project as part of the training, applying MVC architecture and RESTful API design.
- Strengthened skills in server-side logic, database management, and application security.

Frontend Development Intern

2024 – 2025

Bravo Company Diploma

- Completed a comprehensive Frontend Development Diploma covering the React.js ecosystem and modern UI libraries.
- Developed BlueBerry, a full-featured E-Commerce web application independently as the diploma final project.
- Implemented advanced features including dynamic routing, Context API for state management, API integration with Axios, dark/light mode, and fully responsive design.

API Testing Intern

2024 (2 Weeks)

Faculty of Computers and Information, Zagazig University

- Completed a two-week intensive internship focused on API testing methodologies and tools.
- Gained practical experience in validating RESTful APIs, testing endpoints, and documenting results.

PROJECTS

CleanCity — Waste Reporting Platform

2026

NTI Final Project | Laravel 12, PHP 8.2, MySQL, RESTful API, Laravel Sanctum

- Built a RESTful backend with 25+ API endpoints serving 3 user roles (citizen, cleanup company, admin).
- Implemented geolocation-based Auto-Assignment and a Clean Route optimizer (Nearest Neighbor + Haversine) to streamline multi-stop pickups.
- Applied MVC architecture, Sanctum token-based auth, role-based access control, and a gamification layer (points & leaderboard).
- GitHub: github.com/NouraMohamed7/clean-city-backend

MedConnect — Seller Dashboard

2025

Individual Project | React.js, React Router, REST APIs, React-Toastify

- Developed a responsive seller dashboard with protected routing and authentication-based access control.
- Built complete product, order, and buyer request management modules with REST API integration.
- Designed a buyer-seller messaging interface and an analytics dashboard with sales visualization and KPI metrics.
- Applied component-based architecture and a modular API service layer to improve code maintainability and scalability.

Exclusive — E-Commerce Dashboard (Supplier Portal)

2025

Team Project — Graduation Project | React.js, Vite

- Led frontend development of a responsive supplier-facing dashboard within a cross-functional team (Frontend, Backend, Mobile).
- GitHub: github.com/NouraMohamed7/Exclusive-my-pro

Deep Dive Frontend Workshop — Team Project (1st Place)

2025

Workshop Competition | Frontend & Backend Integration

- Competed in an intensive frontend workshop with a team project integrating Frontend and Backend; awarded 1st place among all competing teams.

BlueBerry — E-Commerce Platform

2024

Individual Project | React.js, Axios, Context API, React Router DOM, Framer Motion

- Built a complete, responsive e-commerce app independently, featuring smart search, real-time cart, product comparison, wishlist, and dark/light mode.
- Integrated external REST APIs and local JSON data using React Context API for scalable state management.
- Live Demo: nouramohamed7.github.io/blue-berry-ecommerce | GitHub: github.com/NouraMohamed7

TECHNICAL SKILLS

- **Frontend:** React.js, Vite, JavaScript (ES6+), HTML5, CSS3, Bootstrap, React Bootstrap, React Router DOM, Framer Motion, Axios
- **Backend:** PHP, Laravel, MVC Architecture, RESTful APIs, Laravel Sanctum
- **Databases:** MySQL, PL/SQL, Database Design
- **CS Concepts:** C++, Object-Oriented Programming (OOP), Data Structures
- **Tools:** Git, GitHub, Postman, VS Code, Figma, Vercel, Netlify
- **Languages:** Arabic (Native), English (Professional)
